FACTS AND FIGURES FROM THE WORLD OF KHS

Aha!

11/3/2020 , 1 min.

The warehouse covers an area of
20,000 SQUARE METERS
– about the size of four soccer fields.

At peak times up to
88,000 PICKS*
PER MONTH
are made at the WLC.

*Pick = in warehouse logistics the selection of a part or small pack.

KHS World Logistics Center

CENTRAL SPARE PARTS WAREHOUSE

Not only during a crisis such as the corona pandemic is it important to provide a smooth supply of spare and wear parts to the beverage industry. After all, this also ensures the greatest possible availability of production systems and thus efficiency. A few impressive facts and figures from last year illustrate just how productive and reliable the KHS World Logistics Center (WLC) in Dortmund is in this respect. Not even the crisis of 2020 has been able to impact this!

TWO HOURS ON AVERAGE

The mean reaction time for spare parts on machine downtimes is two hours to handover of the parts to Shipping. On average 630 machine downtimes are processed per year, 50 of them on weekends.

Over

200

employees from Order Management and Technical Support work in offer and order processing in Bad Kreuznach, Kleve, Worms, Hamburg and Dortmund.

Of the more than

8,150

conversion offers submitted, over 1,650 orders are placed with a parts volume of about four euro pallets each.

From the more than

60,000

spare parts inquiries received, binding offers for about two thirds are prepared within one day. About 80% of all inquiries become orders; half of these are shipped within a week.
