DRINKTEC 2025 TRADE SHOW SPECIAL

Lots to talk about

7/17/2025 , 2 minutes reading time

From September 15 to 19, 2025, the entire beverage industry will be meeting at the exhibition center in Munich, Germany, where at drinktec, the sector's leading international trade show, professionals from all over the world will be looking for innovation and inspiration to help them make their businesses even more efficient and sustainable.

As at every drinktec, this year, too, Dortmund systems supplier KHS will be one of the biggest exhibitors. As a key technology partner to the industry, the machine engineering company will have a lot to show and tell guests at its booth in Hall B4. In this special drinktec issue of our web magazine, we've put together a number of interesting articles for you on KHS' visit to the exhibition and the products, systems and services we'll be presenting there.

The following are among the topics we'll be focusing on:

- **Filling and packaging systems** for increased circularity with a lower TCO
- **Holistic line solutions** for greater efficiency and lower costs
- **Digital systems and solutions** for better performance and maximum IT/OT security
- **Services** to ensure that your production lines run for 25 years and longer.

Until October, check back here regularly for further articles on KHS's presence at the trade show.

DRINKTEC 2025

Expertise right down the line

At the KHS booth for drinktec, the world's leading trade show for the beverage industry held in Munich, Germany, you can expect to see pioneering technologies and smart services: the Dortmund systems supplier will be presenting new developments for all container segments, plus digital solutions and training courses aimed at line optimization.

CAP INSPECTION TECHNOLOGY

AI sees more

Tethered caps for PET bottles have been mandatory throughout the EU since July 2024, presenting new challenges that call for a clever solution: with the help of AI, the KHS Innocheck TSI checks that the tamper-evident seals on screw closures are intact, correctly seated and not damaged in any way.

PLASMAX BARRIER TECHNOLOGY

Faster, better, lighter

For many years, tried-and-tested, fully circular Plasmax product protection for PET bottles has proved to be a real success story. And the next chapter is already complete: the KHS technology now scores with higher outputs, lower overall operating costs and even longer shelf lives. To be continued ...
